

Estimating the Impact of USAID-Funded Contraceptives: Ukraine

Overall Contraceptive Use by Method

Estimated Contraceptive Users, 2020-2024

	2020	2021	2022	2023	2024
Condoms	2,680,000	2,668,000	2,487,000	2,299,000	2,333,000
Pills	610,000	607,000	566,000	523,000	531,000
Injectables	2,000	2,000	2,000	2,000	2,000
Implants	10,000	10,000	10,000	9,000	9,000
IUD	1,124,000	1,120,000	1,044,000	965,000	979,000
Sterilization	76,000	75,000	70,000	65,000	66,000
Other	107,000	106,000	99,000	92,000	93,000
Total	4,609,000	4,588,000	4,278,000	3,955,000	4,013,000

Source: Method Mix from 2012 MICS applied to modern user estimates from FP2030 2025 Report

USAID's Contribution to Contraceptive Procurement

USAID-Funded Contraceptive Commodities Procured, 2020-2024

	2020	2021	2022	2023	2024
Condoms	0	0	1,779,000	3,360,000	1,654,500
Pills	0	0	0	0	0
Injectables	0	0	0	0	0
Implants	0	0	0	0	0
IUD	0	0	0	0	0
Other	0	0	0	0	0

Source: RH Viz, April 2025

Note: "Other" includes emergency contraception, syringes and accessories, standard days method, and trocars. Condom values have been adjusted to exclude condoms procured for HIV programs. For USAID, an assumption was made that 75% of condoms were procured for HIV programs (based on reporting from GHSC-PSM)

Estimating the Comparative Value of USAID's Contraceptive Procurement

Total USD Value of Donor-Funded Contraceptive Products Procured, by Funder, 2020-2024

	2020	2021	2022	2023	2024
UNFPA Supplies	\$0	\$0	\$0	\$0	\$0
USAID	\$0	\$0	\$57,995	\$109,536	\$53,937
Other Donor	\$0	\$0	\$0	\$0	\$0
NGO/SMO	\$0	\$0	\$0	\$0	\$0
Other	\$0	\$0	\$0	\$50,700	\$0
UNFPA Co Financing	\$0	\$0	\$0	\$1,473,590	\$0
Total	\$0	\$0	\$57,995	\$1,633,826	\$53,937
% USAID	#DIV/0!	#DIV/0!	100%	7%	100%

Source: RH Viz, April 2025

Note: Values are only for the commodities and do not include estimates of the shipping and associated costs to get those products to the country. Values exclude personal lubricants. Condom values have been adjusted to exclude condoms procured for HIV programs. For USAID, an assumption was made that 75% of condoms were procured for HIV programs (based on reporting from GHSC-PSM) and for Global Fund, an assumption was made that 100% of condoms were procured for HIV.

Estimating the Impacts of Donor-Funded Contraceptives and USAID's Contribution

Estimated Impacts of Contraceptive Products Procured in 2024

	Impacts of Total Commodities (all funders)	Impacts of USAID-funded Commodities only	Impacts of Total Commodities <u>without</u> USAID-funded Commodities	% of Total Impact that came from USAID
Demographic impacts				
<i>Unintended pregnancies averted</i>	4,300	4,300	0	100%
<i>Live births averted</i>	600	600	0	100%
<i>Abortions averted</i>	3,300	3,300	0	100%
Health impacts				
<i>Maternal deaths averted</i>	0	0	0	#DIV/0!
<i>Child deaths averted*</i>	0	0	0	#DIV/0!
<i>Unsafe abortions averted</i>	470	470	0	100%
Couple Years of Protection (CYPs)				
<i>Total CYPs (FP only)</i>	13,788	13,788	0	100%

Notes: Impact estimates are Service-Lifespan impacts based on default Impact2 Model values; RH Viz does not specify implant or injectable type, so implant procurement was split evenly into 5-year and 3-year implants, and injectables were assumed to be 3-month injectables; 2025 commitments (in terms of \$ or products) not available, so 2024 is a proxy to estimate the impact of USAID funded FP commodity procurement

* Estimates of child deaths averted may be unreliable because there is currently very limited data about the linkages between CPR, birth spacing and child mortality. This part of Impact 2 will be updated as improved research becomes available.
